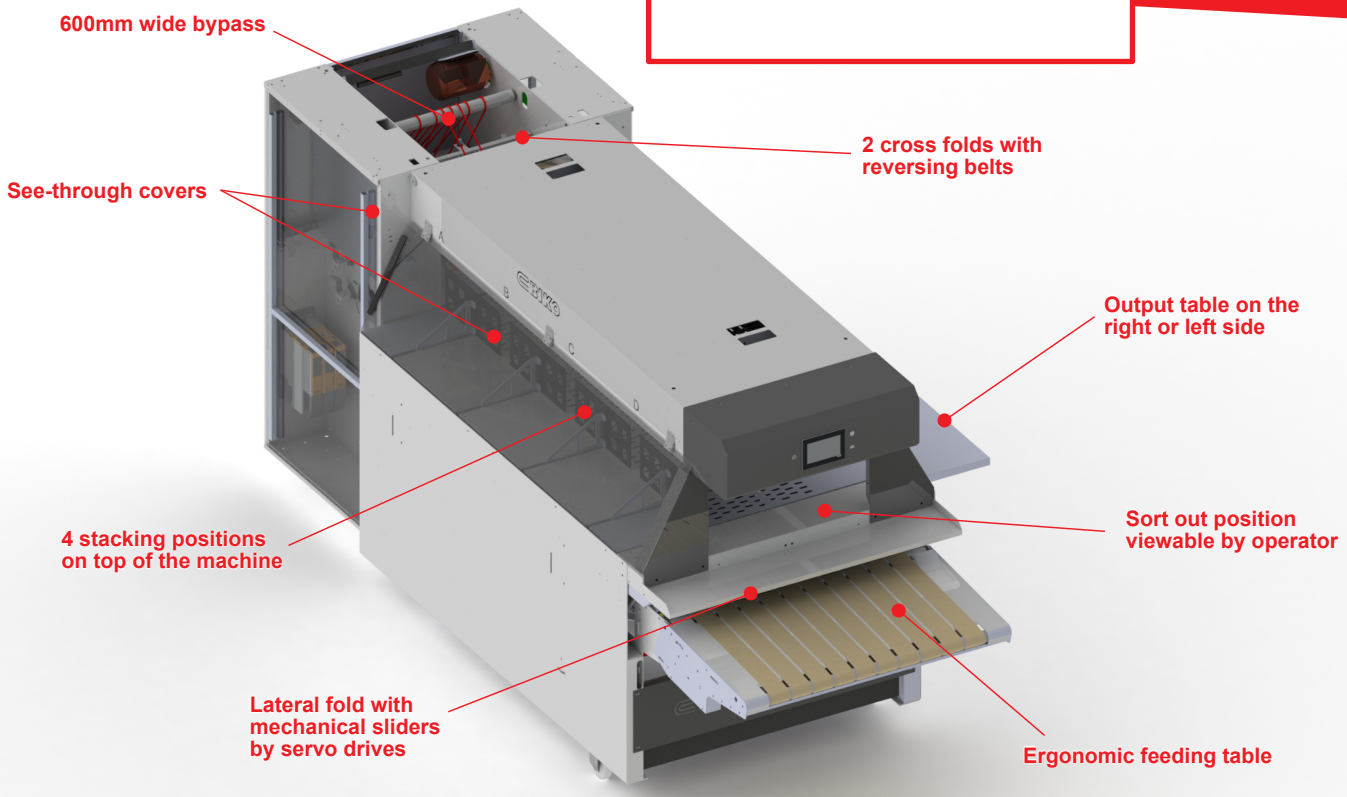
Lena Pro



#LenaPro: advanced french fold towel folder

The full range of hospitality towels can be folded by #LenaPro. Towels up to a length of 2.2m can be sorted as desired on the 4 stacking positions. There are 2 cross folds in the machine that will always give you the freedom to choose the desired way of folding. If you use #LenaPro as folder in combination with #Roger or #Robin, #LenaPro ensures that you receive the quality, reliability, efficiency and productivity you need.

Standard Features

- Towels up to 2.2m length
- French fold with mechanical sliders and skis by servo drives
- 2 cross folds with reversing belt technology
- 4 stacking positions
- All drives with frequency inverters
- Output of piles to the left or to the right
- Machine on wheels

Optional Features

- Project specific discharge conveyors
- Bigger output table
- Vacuum on feeding table
- Height adjustable feeding table
- Recommended spare parts kit
