

Eva

#Eva: an automatic washcloth/towel separator

Take the manual labor out of your towel processing line. #Eva separates washcloths and towels from missorted or mixed items. It can process more than 2000 pieces per hour. With multiple sorting discharge positions and lane operations, this workhorse can be paired with several #Sara units and/or several units of #Robin and #Roy for an all-star towel processing line or used independently for faster hand processing.

Standard Features

- Sorts items by size
- Sorts various types of materials
- Multi-lane operation for higher throughput
- More than 2000 picks per hour
- Multiple sorting positions
- Easily loaded manually, by rail or other methods
- Low maintenance costs

Optional Features

- Project specific discharge conveyor extensions
- Color sorting sensors
- Sorting by artificial intelligence to sort almost everything
- Recommended spare parts kit
